

FORMRITE®

A Huber Engineered Woods Product

Non-Structural
Concrete-Forming Board*

FORMRITE® concrete-forming board is an engineered wood alternative to solid-sawn lumber used in forming applications including sidewalks, slab-on-grade, curbing and other non-structural concrete products.

- *Durable and reusable for multiple pours
Saves you time and money*
- *Manufactured using advanced resin and
press technologies for superior moisture
resistance*
- *Solid and straight*
