

Environmental Product Declaration

- >> AdvanTech® Flooring and ZIP System® Sheathing and Tape manufacturing processes are **greater than 99% landfill free. Just 2% of waste is produced, with most of it being recycled.**
- >> **Wood, which is 100% biodegradable, is the main component** of Huber Engineered Woods products, comprising more than 90% of each product.
- >> Huber Engineered Woods utilizes manufacturing plants located in Commerce, Georgia; Broken Bow, Oklahoma; Crystal Hill, Virginia; and Easton, Maine, **reducing the distance materials travel** to and from the plants.
- >> ZIP System sheathing and AdvanTech flooring **require no energy or water during the use stage**, and require no maintenance, repair, replacement, or refurbishment during their service lives.
- >> ZIP System roof and wall sheathing provides **air sealing potential for buildings.** ZIP System R-Sheathing provides air sealing and thermal resistance.
- >> All ZIP System sheathing products include **built-in water resistive barriers** to prevent moisture leakage in homes.
- >> ZIP System R-6 Sheathing requires just **10-16 months of service to make up for its global warming impacts**, thanks to its built-in continuous foam insulation.
- >> In a 30-day exposure test, **AdvanTech flooring had less water absorption – or less moisture content – on average than the competitive OSB and plywood panels tested.** AdvanTech flooring is the only 23/32" OSB product tested that did not drop below the PS-2 industry standard for subfloor stiffness. This stiffness retention could be an indicator of a longer product service life.

ZIP System sheathing is the only combination structural panel of its kind to achieve a cradle-to-grave environmental product declaration.

AdvanTech® sheathing is the first premium wood structural panel with code recognized design values that exceed traditional PS2 panels to release a cradle-to-grave EPD.
