RE: Huber EXACOR™ Testing with LATICRETE® Materials

Dear Mr. Richardson,

Thank you for your interest in using LATICRETE® products over the Huber EXACOR™ magnesium oxide panels.

From the sample boards received, LATICRETE performed adhesion testing following procedures outlined in ASTM C1583 (2004) as well as a modified version of ASTM A118.15 (2019) that encompassed a 7-day bond test from the standard 28-day test. Tests were conducted in the LATICRETE R&D Laboratory under lab conditions, 70°F (21°C) and 50% RH. I am please to inform you that each LATICRETE product listed below adhered well to the EXACOR panels when used in accordance with LATICRETE written instructions.

Bonding Primer
PRIME-N-BOND™

Uncoupling Membrane
STRATA_MAT™

Surface Prep Material
NXT® Skim Lite
NXT® LEVEL PLUS

Please be advised that this in-house testing depicts results independent of time and weather-related effects. Actual results may vary based on jobsite conditions, time, and application type. As such, these results should only be used as a guide. LATICRETE limited warranties are subject to full compliance of LATICRETE written instructions and guidelines, industry standards, and following local building codes. The standard warranties can be found at <https://laticrete.com/en/support-and-downloads/product-support/warranties>.

Should additional information be required, please review the applicable product datasheet at www.laticrete.com, contact the local LATICRETE Technical Sales Representative, or reach out to the LATICRETE Technical Service Department @ 1-800-243-4788 ext. 1235.

Best Regards,

Curtis Rogers-Vereen
Manager, Technical Services
LATICRETE International, Inc.
