ZIP SYSTEM™ VAPOR PERMEABLE FLASHING TAPE: WHERE HIGH PERFORMANCE & VAPOR PERMEABILITY MEET.

The new ZIP System™ VP Flashing Tape rounds out a portfolio of sealing materials that include a wide variety of 15 different straight and “stretch” tapes, as well as fluid-applied flashing offerings. ZIP System VP Tape offers all the benefits of standard ZIP System™ flashing tape with a high-powered acrylic adhesive and broad temperature application range, with the added feature of a higher permeance¹ for teams seeking to increase this factor for unique designs or environments.

The high-performing professional tape is used in panel seam sealing and flashing applications, key components of a ZIP System® wall assembly using ZIP System® integrated sheathing. The combination is an all-in-one structural assembly with built-in water-resistive barrier and rigid air barrier with a tape perm rating higher than standard ZIP System flashing tape for teams seeking a specific permeability in their designs.

---

1. ZIP System™ flashing tape is < 1 perm; ZIP System™ VP Tape is 3 perms when tested in accordance with ASTM E96 B.
3. When applied in accordance with ZIP System sheathing and tape Installation Manual instructions available on ZIPSystem.com.
