Thanks to our relentless passion for creating better building solutions, ZIP System® building enclosures provide built-in water, air and thermal control along with streamlined installation. As a result, our family of structural and sealing products makes it easy to meet your highest standards, satisfy new energy codes and just plain build better homes.

ZIPRevolution.com
STREAMLINE WEATHERIZATION WITH ZIP SYSTEM® SHEATHING AND TAPE.

SPEED AND EASE OF INSTALLATION
ZIP System® sheathing and tape is easier to install than traditional housewrap and felt, helping save money on labor costs and improve project cycle times.

BUILT-IN WATER-RESISTIVE BARRIER
By achieving optimal levels of permeability and drainage, ZIP System sheathing and tape protects against water intrusion, while still allowing the panels to properly dry.

ENERGY-EFFICIENT AIR BARRIER
ZIP System sheathing and tape forms a tight barrier against unwanted air leakage, for a durable building envelope that helps promote energy efficiency and increase interior comfort.

ENHANCED STRUCTURAL DURABILITY
ZIP System® panels are available with a Structural 1 rating, so you can get the ultimate shear strength to meet seismic and high-wind zone requirements.

ENHANCED THERMAL RESISTANCE
The all-in-one ZIP System® R-sheathing panel with a built-in layer of insulation helps add R-value to exterior sheathing with a single easy-to-install panel.

PEACE OF MIND
The ZIP System® product line is backed with a 30-year Limited Warranty.

AWARD-WINNING QUALITY
ZIP System® wall sheathing and tape has been rated #1 in quality every year since 2015 by BUILDER magazine’s annual nationwide survey of builders.

1. BUILDER magazine’s 2015-2018 Brand Use Studies; Wall Sheathing category.
2. Limitations and restrictions apply. Visit HuberWood.com/ZIP/ResidentialWarranty to learn more.
ZIP System® wall sheathing is a structural sheathing panel providing integrated air, water and vapor management, which eliminates the need for housewrap.
ZIP System® sheathing and tape protects against water intrusion with a built-in water-resistive barrier (WRB) that erases the need for housewrap. The integrated weather barrier on the panel eliminates the risk of water becoming trapped between the protective layer and the sheathing panel. With an optimal permeance level (12-16 perms), the built-in WRB layer allows panels to properly dry-out. Plus, ZIP System sheathing and tape achieves greater than 90 percent drainage efficiency when tested in accordance with ASTM E-2273.

CONTINUOUS RIGID AIR BARRIER

To create a tight enclosure, ZIP System® sheathing panel seams are sealed with ZIP System™ tape to form a continuous rigid air barrier. ZIP System sheathing and tape integrates multiple control layers to manage air leakage into one easy-to-install system. This streamlined enclosure solution has transformed the way many high-performance teams build Passive House-, Energy Star- or LEED-certified structures.
ZIP IT TIGHT™ WITH A VARIETY OF CLADDING MATERIALS

ZIP System® sheathing and tape provides an excellent substrate for wall claddings including brick, siding, stucco or cedar shingles. The panels install flat and stay flat, ensuring a finished wall that looks as good as it performs.

BIM materials available at HuberWood.com.

PROTECT YOUR BUILD FROM THE ELEMENTS

1. Integrated water-resistive barrier
2. Continuous rigid air barrier
3. Self-spacing edge profile
4. Eliminates the need for housewrap

<sup>1</sup> Limitations may apply.

Although all projects are unique, experience has shown that 1 roll of 3-3/4" ZIP System™ flashing tape is needed for approximately 7 sheets of 4' x 8' ZIP System sheathing. This should only be considered a general “rule of thumb” when ordering materials with the understanding that some jobs may require more or less depending on the specific project.
ZIP SYSTEM® LONG LENGTH SHEATHING: TALLER, TOUGHER AND FEWER SEAMS.

Get all the benefits of engineered wood long length wall sheathing, with the built-in moisture and air leakage protection of ZIP System® sheathing and tape technology. ZIP System long length sheathing and wind zone panels provide the flexibility of a longer panel with the ability to eliminate building wrap.

### 7/16 LONG LENGTH

Ideal for single- and multi-story projects. Helps reduce blocking and eliminate horizontal seams in wall applications.

- 4’ x 9’
- 4’ x 10’
- 4’ x 12”

### 7/16 WIND ZONE

With an extra 1-1/8” in length, these panels span from sill plate to top plate to help defend against wind uplift.

- 4’ x 8’ 1-1/8”
- 4’ x 9’ 1-1/8”
- 4’ x 10’ 1-1/8”
- 4’ x 12’ 1-1/8”

### 1/2 LONG LENGTH

For single- and multi-story projects where the extra strength of a 1/2” thick panel is required.

- 4’ x 9’
- 4’ x 10’

*Available with minimum order quantity. Contact your Huber representative for more details.

2. Limitations and restrictions apply. Visit HuberWood.com/ZIP/ResidentialWarranty to learn more.
3. 5/8” 9’ and 10’ panels available by special order.
ZIP System® R-sheathing is the simple all-in-one structural panel with built-in exterior insulation. Featuring integrated moisture, air and thermal protection, ZIP System R-sheathing completely reimagines traditional wall assemblies by streamlining exterior water, air and thermal management.

Available in R-3, R-6, R-9 and R-12 values and three lengths – 8ft, 9ft and 10ft – to suit all climate zones.

**LAYERS OF INNOVATION IN A SINGLE-PANEL SYSTEM**

1. **BUILT-IN EXTERIOR INSULATION**
   - Designed to meet new energy codes, each panel features integrated continuous foam insulation to increase thermal performance and minimize thermal bridging.

2. **STRUCTURAL DURABILITY**
   - An exterior engineered wood panel meets wall bracing requirements, contributes to shear wall designs and provides a nailable, flashable base for cladding, trim and windows.

3. **INTEGRATED WATER-RESISTIVE BARRIER**
   - A built-in water-resistive barrier eliminates the need for housewrap and helps achieve a quick rough dry-in backed by a 180-day Exposure Guarantee and 30-year Limited Warranty.¹

4. **CONTINUOUS AIR BARRIER**
   - Taped seams create a continuous air barrier that helps prevent air leakage and protects insulation R-value as part of an energy-efficient enclosure.

Notes:
2. Prescriptive bracing requirements with Douglas Fir-Larch Framing under the 2015, 2012 and 2009 IRC.
3. Not approved for use as prescriptive wall bracing where wind design is required by R301.2.1.1.
4. Engineered shear wall requirements with Douglas Fir-Larch Framing under the 2015, 2012 and 2009 IBC.
5. If framing with other than Douglas Fir-Larch, the shear value above must be multiplied by the Specific Gravity Adjustment Factor = \[1 - (0.50 - SG)\], where SG=Specific Gravity of the framing lumber in accordance with the ANSI/AWC NDS. This adjustment factor must not be greater than 1.
6. Fasteners must be common nails or equivalent, or staples, of a type generally used to attach wood sheathing.
7. The shearwalls must have a maximum height-to-width aspect ratio of 2:1.
8. ZIP System R-sheathing used as the lateral resistance system in seismic zones D0, D1, D2, and E should be designed in accordance to ER-482.
9. This panel and fastening configuration is only applicable to the prescriptive bracing requirements under the 2015 IRC.

For SI: Inch = 25.4mm; 1 pound per foot (ppf) = 14.59 N/m.

For more information, visit HuberWood.com/ZIP/ZipSystem.
ZIP System® sheathing and tape delivers a sealed roof deck and integrated underlayment built into every panel. Build with confidence knowing your roof has a continuous weather barrier, and capture the financial and scheduling benefits of immediate rough dry-in with ZIP System™ flashing tape.

**PROTECTION AGAINST WATER INTRUSION**
The combination of a built-in water-resistant barrier and taped panel seams protects against water intrusion and eliminates the need for traditional felt.

**STRUCTURAL DURABILITY**
High-strength engineered wood panels with Structural 1 rating provide strength and stiffness for a dependable roof deck.¹

**QUICKER ROUGH DRY-IN**
Simply install the panels and tape the seams to achieve a quicker rough dry-in, allowing mechanicals and other trades to start sooner.

**ELIMINATE COSTLY RE-WORK**
With a built-in water-resistant barrier, there’s no risk of water getting behind your protective outer layer and damaging sheathing panels, which can cause costly delays for re-work.

**PEACE OF MIND**
The ZIP System® product line is backed with a 180-day Exposure Guarantee and 30-year Limited Warranty.³

---

1. Sheathing panels stamped with Structural 1 panel grade are required to meet or exceed racking shear and cross-panel strength and stiffness listed within the Voluntary Product Standard (PS2-10) for Wood-Based Structural-Use Panels.
2. H-clips are required in roof applications for ZIP System 7/16” panels where roof framing is greater than 16” on center.
4. Limitations may apply.

Although all projects are unique, experience has shown that 1 roll of 3-3/4” ZIP System™ flashing tape is needed for approximately 7 sheets of 4’ x 8’ ZIP System® sheathing. This should only be considered a general “rule of thumb” when ordering materials with the understanding that some jobs may require more or less depending on the specific project.
COMPATIBLE WITH ANY ROOF COVERING & UNDERLAYMENT

ZIP System® sheathing and tape provides an excellent roof underlayment to receive many finished roof coverings including metal, tile and asphalt shingles, fiberglass shingles or cedar shingles. The panels lie flat and stay flat, ensuring a finished roof that looks as good as it performs.

For easy-to-achieve, continuous air and water barriers in roof and wall assemblies, no matter what the turn, twist, curve or corner, seal it in a flash with ZIP System™ sealing solutions.
An integral part of ZIP System™ roof and wall assemblies, ZIP System™ flashing tapes feature pressure-activated advanced acrylic adhesive. When used with ZIP System™ panels, ZIP System flashing tapes help form a strong, weather-resistant, continuous barrier backed by a 30-year Limited Warranty and 180-day Exposure Guarantee.¹

---

**SLIP RESISTANT**
- Top layer provides slip-resistant tack during installation for safety

**WEATHER PROTECTION**
- Thick inner layer offers dimensional stability
- Carbon black for “sunscreen” that protects other layers
- Antioxidants for durability

**LONG-TERM DURABILITY**
- Bonding layer specially formulated to bond with the adhesive for durability

**ADVANCED ADHESION**
- Consistent adhesion even under harsh weather conditions
- Backed by 30-year Limited Warranty and 180-day Exposure Guarantee, when used with ZIP System® sheathing¹
- Resists heat and UV light and creates permanent bond strength

ZIP System™ stretch tape easily stretches to fit sills, curves and corners with a single piece without having to piece tape segments together. Made of a high-performance composite acrylic, the tape conforms to challenging applications and locks out moisture even over mismatched surfaces.

**STRETCHES TO FIT**
Easily stretches to conform to corners and curves.

**EXCELLENT MOISTURE BARRIER**
Provides a strong, tight bond for an effective ZIP IT TIGHT™ seal, even around fasteners.

**LABOR SAVING**
Eliminates the need to piece tape segments together in challenging applications.

**REPOSITIONABLE**
Can be pulled up and reapplied for hassle-free installation.

**VERSATILE**
Ideal for your toughest applications including curved windows and wall penetrations.

ZIP System™ LIQUID FLASH

ZIP System™ liquid flash is a fluid-applied membrane that easily flows into recessed windows and around penetrations and other hard-to-flash areas, in addition to sealing transitions from wall sheathing to foundations. Plus, the moisture-curing formula helps complete exteriors in the toughest conditions.

Flows easily to seal irregular shapes and surfaces.

 Experts agree: ZIP System™ liquid flash is the right choice for sealing transitions from wall sheathing to foundations.

OPTIMAL VISCOSITY
Flows easily to seal difficult areas, such as rough openings and wall penetrations.

QUICK CURE TIME
Weather-resistant and tack-free in as quick as 20–40 minutes, depending on conditions. Target thickness achieved when substrate is no longer visible.

WEATHER PROTECTION
Backed by 30-year Limited Warranty and 180-day Exposure Guarantee, when used with ZIP System® sheathing.

PROPER ADHESION TO A WIDE RANGE OF SURFACES
Bonds to wood, concrete, masonry, architectural metals, glass, PVC, FRP, EPDM and most other building materials.

For videos and purchasing information, visit ZIPliquidflash.com

3. At 70°F and 50 percent relative humidity. Low temperatures and low relative humidity slow dry time; high temperatures and high relative humidity accelerate dry time.
ZIP SYSTEM™ TAPE ROLLER

Take the guesswork out of seam sealing with the ZIP System™ tape roller. Designed to give you a visual indicator where the tape has been rolled, the ZIP System tape roller makes seam sealing simple by leaving a "Z" impression on the tape, for an easy quality control check. Plus, the split-neck roller design allows for easy access in tough-to-reach spots such as inside corners and around windows and doors.
