

# FACT SHEET:

## ZIP SYSTEM™ LEAK-FREE GUARANTEE\*

### INTRODUCING ZIP SYSTEM™ PEEL AND STICK UNDERLAYMENT

Huber Engineered Woods introduces ZIP System™ peel and stick underlayment for roof assemblies. Available where ZIP System™ products are sold, the self-adhered, rubberized asphalt underlayment meets code requirements for use as an ice barrier and underlayment in roof applications. When installed as a waterproofing roof underlayment layer over a ZIP System™ Roof Assembly using ZIP System® sheathing and tape, the assembly can be backed by a Leak-Free Guarantee.<sup>1</sup>

Adding ZIP System peel and stick underlayment to a ZIP System™ Roof Assembly can help teams meet requirements in areas prone to ice dams and wind-driven rain. The Leak-Free Guarantee will cover areas of the roof assembly where ZIP System sheathing, tape and peel and stick underlayment are combined. Whether it is applied to eaves, valleys or the whole roof, a project is eligible. Project registration is required. Leak-Free Guarantee terms, conditions and assembly requirements can be found at [LeakFreeGuarantee.co](http://LeakFreeGuarantee.co).

#### ZIP System Leak-Free Guarantee Guidelines:

- Wood-framed roofs 24 in.on center or less, with a 2:12 or greater pitch
- Use ½” or 5/8” ZIP System sheathing panels with code recognized fasteners and fastening patterns
- Seal seams and transitions with ZIP System™ flashing tape
- Apply ZIP System peel and stick underlayment to eaves, valleys or the whole roof
- Register your project at [LeakFreeGuarantee.co/register](http://LeakFreeGuarantee.co/register)

#### ZIP System peel and stick underlayment features:

- Does not require fasteners, nails or clips
- Seals around roof covering nails
- Slip-resistant
- Split liner application for ease of installation
- High-performance rubberized asphalt adhesive technology
- Meets ice barrier requirements in accordance with ASTM D1970<sup>2</sup>
- Meets roof underlayment code requirements<sup>2</sup>
- Backed by a Leak-Free Guarantee when combined with ZIP System sheathing and tape in a ZIP System Roof Assembly<sup>1</sup>

<sup>1</sup> Registration Required. Leak-Free Guarantee applies only when using a ZIP System Roof Assembly. See [LeakFreeGuarantee.co](http://LeakFreeGuarantee.co) for details and the definition of a ZIP System Roof Assembly.

<sup>2</sup> See ICC-ES ESR-4904 for code recognition.
