

FACT SHEET: ZIP SYSTEM[™] STRETCH TAPE

ZIP System[™] stretch tape easily stretches to fit sills, curves and corners with a single piece without having to tape segments together. Made of a high-performance composite acrylic, ZIP System stretch tape conforms to challenging applications and locks out moisture even over mismatched surfaces. ZIP System stretch tape can be pulled up and reapplied for hassle-free installation, providing a tight, energy-efficient seal.

ZIP System stretch tape is a fast, effective way to seal around curves and corners, so builders can zip through tricky installations with ease. In addition, ZIP System stretch tape offers all of the following:

- One-piece application.
- Continuous water-resistive barrier efficiency when used with ZIP System[®] sheathing.
- Application in temperatures as low as 20°F and as high as 120°F.
- Repositionable, and may be pulled up and reapplied without sacrificing adhesion.
- 180-day exposure guarantee.¹
- Powerful acrylic adhesion
- Tensile strength of 225 PSI.
- Elongation of 800-1200%.
- Available nationwide in 75-foot long rolls.
